Longbranch

On the west side of the Cascades in the State of Washington among the bays and inlets of South Puget Sound lies the twenty mile long Key Peninsula. In the early decades of the 20th century, in the open spaces of cleared farmland in the forests on the peninsula surrounded by the waters of the Sound filled with salmon, shellfish, seals, and occasionally whales, there was a land of pioneering lumbermen, farmers and fishermen. Linked to the outside world by water more than road, boats and boat transportation were an essential part of the life of the people. This is the land in which Longbranch came into existence
